

PROJECT NAME: Utah State University Advanced Scientific Computing

RECIPIENT: Utah State University

LOCATION: Logan, Utah

PURPOSE: Funding for this project will enhance advanced scientific computing at Utah State University. It has two emphases: (1) strengthening USU's high performance computing infrastructure to address the growing computational demands posed by burgeoning energy-related research, and (2) learning how to mimic biology to solve, by massive parallelism, the important, computationally hard problem of dynamic resource management.

AMOUNT: \$1,673,120
